Note:
1. Due to the ongoing nature of the INFO PAK it is necessary to, occasionally, revamp the Table of Contents. The table may not be up-to-date at all times, as new data are introduced and obsolete data are discontinued.
2. Community Association data, as published prior to April 1, 1982, are now presented by Community Districts, thus increasing the accuracy of the data.
3. The boundaries of the City and Metropolitan Calgary became the same August 15, 1964.

Note:
1) Mortality rates assumed to remain constant at 1981 levels in all projections.
2) Fertility rates assumed to remain constant for the duration of the projections.
3) The boundaries of the City and Metropolitan Calgary have been the same since August 15, 1964.
4) These forecasts were based on the Cohort Survival method of population forecasting.
5) The shaded column represents the medium projection recommended by the Corporate Resources Department as that considered most likely at this time. However, the projections provide a feasible range of possibilities and should not be viewed as a prediction of what the City of Calgary population will be at any given time, but rather as a projection of what could happen if the conditions assumed actually prevail.

Note:
1) Mortality rates assumed to remain constant at 1981 levels in all projections.
2) Fertility rates assumed to remain constant for the duration of the projections.
3) The boundaries of the City and Metropolitan Calgary have been the same since August 15, 1964.
4) These forecasts were based on the Cohort Survival method of population forecasting.
5) The shaded column represents the medium projection recommended by the Corporate Resources Department as that considered most likely at this time. However, the projections provide a feasible range of possibilities and should not be viewed as a prediction of what the City of Calgary population will be at any given time, but rather as a projection of what could happen if the conditions assumed actually prevail.

Note: 1) This forecast is based on an assumed medium total fertility rate of 1.6 and annual medium net migration of, 1984-85: -6,500; 1985-86: -3,500; 1986-87: -1,500; 1987-88: 500; 1988-89: 1,500; 1989-90: 2,500; 1990-91: 4,000; 1991-92: 5,500, and 1992-2005: 6,500. The forecast should not be viewed as a prediction of what the City's population will be at any given time, but rather as a projection of what could happen if the conditions assumed actually prevail.

2) All individual values and totals in this table have been rounded; thus the reported totals do not necessarily equal the sum of individual values.

[d] After LRT is in operation.
[e] Retail only.

The following defines Shopping Centre Types and Characteristics as quoted in the Calgary Municipal Plan:

Regional Shopping Centres

Provide full depth and variety of shopping goods of a range comparable to the downtown area. Their relationship to the surrounding communities requires careful integration into area plans prior to and during development.

Principal Tenant: Major Department Store(s)
Site Area: Greater than 30 Acres
Gross Leasable Area: Greater than 300,000 Square Feet

Sector Shopping Centres

Provide depth and variety of commercial goods to several communities. Their association with surrounding land uses requires careful integration into area plans prior to and during development.

Principal Tenant: Junior Department Store(s)
Site Area: Between 4 and 30 Acres.
Gross Leasable Area: Greater than 90,000 Square Feet and Less than 300,000 Square Feet

NOTE: 1. Shopping Centres have generally increased in size since the Calgary Municipal Plan was published in 1981. Consequently, the gross leasable area of some centres exceeds the definition shown above.
2. The square footage of gross leasable area, as shown above, has been rounded.

Acknowledgement: The attached lay-out maps of Shopping Centres were volunteered by some of the Centres.
